Medical Knowledge - 1

4) MK-1. Locate, appraise, assimilate evidence from scientific studies related to patients' problems.

1 most =				Level 3		Level 4				
Explains basic principles of evidence-based medicine, but relevance is limited by lack of clinical exposure.		Recognizes the importance of evidence to patient care, searches literature when asked to do so; startin- to learn critical appraisal skills.	of ;	Performs literature searches without prompting to fill knowledge gaps and advance patient care; is able to critically appraise major outcomes; may need guidance.	?	Self-motivated to perform and critically appraise advanced searches related to knowledge gaps and patient care; shares findings with others to improve their abilities.		Level 5 Role model for the routine practice of evidence-based medicine at the individual patient, population and organizational levels.	N/A

Professionalism - 2

10) PROF-2. Trustworthiness that makes colleagues feel secure when one is responsible for patients.

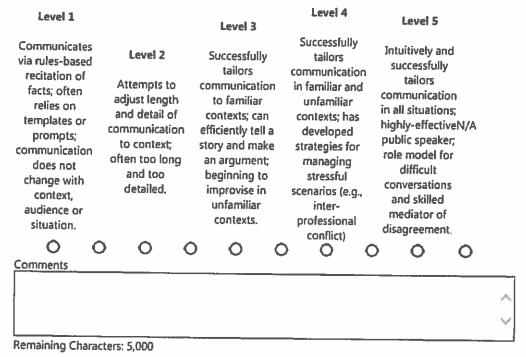

Level 1		Level 3	Level 4	Level 5
Has important gaps in knowledge or skill and/or does not recognize when he/she needs clinical guidance; may not attend to detail or accuracy.	Knowledge and skill improving; beginning to recognize when he/she needs clinical guidance; follow-through may be inconsistent.	Has solid knowledge and skill and good insight into his/her limitations; seeks help when needed; prioritizes high- risk conditions; follows through with little prompting.	Has broad knowledge and skill; assumes full responsibility for patient care; anticipates problems and demonstrates vigilance; pursues questions and communicates answers; expresses uncertainty and limits of knowledge.	Expert in the field who models responsible, thorough and vigilant care; uncertainty consistently prompts a rigorous search for information to provide best-practice care.
Professionalism - 3	0 (0 0
ri diessionalism - 3				

11) PROF-3. Provide leadership that enhances team function, learning environment, health care etc.

		Level 2				Level 4		Level 5	
Level 1 Manages by mandate with limited ability to allow open communication advocates for self rather than team members.		Implies but does not clarify team member roles and expectations manages mostly through direction, occasionally engaging team members in decision- making.	11 /	Level 3 Provide some clarification of team member roles and expectations; often allows open communication and shared decisionmaking.		Routinely clarifies team member roles and expectations; routinely manages through open communication and shared decision-making; usually is efficient and rarely is directive.	l	Manages a team in a an organized and efficient manner with clear understanding N/A of roles and expectations; empowers, supports and inspires members to take ownership of care.

Interpersonal and Communication Skills - 1

12) ICS-1. Communicate effectively with physicians, other health professionals, health agencies.

Interpersonal and Communication Skills - 3

13) ICS-3. Act in a consultative role to other physicians and health professionals.

				Level 5
Level 1		Level 3	Level 4	Identified by
Actively participates as a member of the consult team; field-specific knowledge limits ability to focus data gathering and presentations to those details pertinent to the questions asked.	Level 2 Is able to focus data gathering and presentations to those details pertinent to the questions asked; is able to generate more focused differential diagnoses and recommendations.	Self-identifies as an integral member of the consult team based on advanced knowledge; strives to provide best-practice recommendations using literature to supplement knowledge; communication is mostly to referring providers rather than bidirectional.	Self-identifies as an expert in the field based on advanced knowledge and experience; uses sound clinical reasoning to provide succinct answers to the questions asked; explains evidence for recommendations; encourages bidirectional communication with referring providers.	self and others as a master clinician who effectively and efficiently brings practical wisdom to consultation; answers to all but the most difficult questions are intuitive; ensures bidirectional communication and collaborative care with referring providers.
